

HUSQVARNA 520iLX - Skin Only

A lightweight and high performance trimmer for professionally oriented users. Perfect for gardeners, landscapers and contractors. Features excellent ergonomics and balance, 2-way rotation trimmer head and long-lasting brushless motor.

Efficient brushless motor

Our in-house developed, advanced brushless motor is 25 % more efficient than a standard brush motor. This means that the motor provides a high and consistent torque – even when you cut high, thick or wet grass.

Battery Through Body Design (Pat. pend.)

The battery is placed horizontally through the machine to reduce the risk of dirt, water, chips and dust getting into the battery compartment, causing connector issues. Also, it enhances the weight distribution and balance of the tool, making it more user-friendly with increased maneuverability. The through body design also offers a high degree of flexibility since it allows battery packs of different sizes to be used.

Dual direction

The rotational direction of the trimmer head can be changed for less grass on walk ways.

Weatherproof (IPX4)

This battery-powered Husqvarna machine fulfils the IPX4 classification for rain resistance. This makes it a long-lasting and reliable tool that can be used all year round in all weather conditions.

FEATURES

- Dual direction, less grass on walk ways
- The battery is placed horizontally through the machine to reduce the risk of dirt and water getting into the battery compartment.
- In-house developed brushless motor
- Fulfils the IPX4 classification for rain resistance, so you can get the job done in all weather conditions.
- Intuitive keypad for easy operating
- Lightweight and well balanced for a comfortable work situation
- Maximum runtime
- SavE™ mode maximises the run time by lowering the rpm and is ideal for tasks that do not require full power.
- Able to be used in all Husqvarna battery tools, our lithium-ion batteries are durable, easy to swap and recharge quickly
- Low noise levels create pleasant work and enable longer working hours even in the most public settings.
- With Tap'n Go, line feeding is done effortlessly by simply pushing the trimmer head into the ground.
- Less parts to serve and an electronically controlled drive system means less downtime and low operation costs.
- This product does not emit CO₂ emissions during use.
